**SupaBrake** Brake Fluid

## SUPABRAKE DOT 4

### Description

SupaBrake is specially formulated for high performance hydraulic brake and clutch systems of automotive vehicles. It offers protection against corrosion and rusting even in the presence of moisture and does not affect natural or synthetic rubber washers.

### Applications

SupaBrake is recommended for all heavy duty hydraulic brake, clutch, disc and drum systems for passenger cars, motorcycles, scooters and heavy duty equipment where this type of fluid is specified.

**Caution: SupaBrake DOT 4 must not be used in braking systems for which a mineral based fluid is recommended**

### Benefits

- High dry boiling point
- Compatible with all types of elastomers
- Low pour point
- Protection against high temperature vapour lock
- Compatible with other fluids meeting FMVSS 116 DOT 3 and DOT 4

### Performance

FMVSS 116 – DOT 4 | SAE J1704/J1703 | ISO 4925 | MS119 | JIS K2233
